1. The first part of the paper is devoted to a general discussion of the problem of the existence of a solution of the system of equations

$$\begin{aligned} \Delta u &= f(x, y, z, u, v, w), \\ \Delta v &= g(x, y, z, u, v, w), \\ \Delta w &= h(x, y, z, u, v, w), \end{aligned} \quad (1)$$

where x, y, z are the coordinates of a point in a domain D of the three-dimensional space, u, v, w are the unknown functions, and f, g, h are given functions. The boundary conditions are assumed to be of the form

$$\begin{aligned} u &= \phi(x, y, z), \\ v &= \psi(x, y, z), \\ w &= \chi(x, y, z), \end{aligned} \quad (2)$$

where ϕ, ψ, χ are given functions. The problem of the existence of a solution of the system (1) with the boundary conditions (2) is the problem of the existence of a solution of the system (1) with the boundary conditions (2).

The second part of the paper is devoted to a detailed study of the problem of the existence of a solution of the system (1) with the boundary conditions (2).

The third part of the paper is devoted to a study of the problem of the existence of a solution of the system (1) with the boundary conditions (2).

The fourth part of the paper is devoted to a study of the problem of the existence of a solution of the system (1) with the boundary conditions (2).

The fifth part of the paper is devoted to a study of the problem of the existence of a solution of the system (1) with the boundary conditions (2).

The sixth part of the paper is devoted to a study of the problem of the existence of a solution of the system (1) with the boundary conditions (2).

The seventh part of the paper is devoted to a study of the problem of the existence of a solution of the system (1) with the boundary conditions (2).

The eighth part of the paper is devoted to a study of the problem of the existence of a solution of the system (1) with the boundary conditions (2).

The ninth part of the paper is devoted to a study of the problem of the existence of a solution of the system (1) with the boundary conditions (2).

The tenth part of the paper is devoted to a study of the problem of the existence of a solution of the system (1) with the boundary conditions (2).
